Agrément Certificate

90/2548

Product Sheet 5

TYVEK⁽¹⁾ CONSTRUCTION MEMBRANES

DUPONT AIRGUARD REFLECTIVE

This Agrément Certificate Product Sheet⁽²⁾ relates to DuPont AirGuard⁽¹⁾ Reflective, for use as an air barrier and vapour control layer in walls and floors.

(1) TYVEK and AirGuard are registered trademarks of E.I. du Pont de Nemours & Co. or its affiliates.

(2) Hereinafter referred to as 'Certificate'.

CERTIFICATION INCLUDES:

- factors relating to compliance with Building Regulations where applicable
- factors relating to additional non-regulatory information where applicable
- independently verified technical specification
- assessment criteria and technical investigations
- design considerations
- installation guidance
- regular surveillance of production
- formal three-yearly review.

KEY FACTORS ASSESSED

Risk of condensation — the product is a vapour control layer and will reduce the risk of interstitial condensation (see section 6).

Air permeability — the product is an air barrier and can reduce heat loss by air infiltration (see section 7).

Thermal insulation — the product can contribute to limiting heat loss through walls and floors (see section 8).

Strength — the product has adequate strength to resist the loads associated with the construction of the wall or floor (see section 9).

Properties in relation to fire — the product is classified as Class E in accordance with EN 13501-1 : 2007 and its use is restricted in some cases by the national Building Regulations (see section 10).

Durability — the product will have a lifetime equal to that of the building element in which it is installed (see section 12).

The BBA has awarded this Certificate to the company named above for the product described herein. This product has been assessed by the BBA as being fit for its intended use provided it is installed, used and maintained as set out in this Certificate.

On behalf of the British Board of Agrément

Date of Fifth issue: 2 March 2021

Originally certificated on 29 March 2011

Hardy Giesler
Chief Executive Officer

The BBA is a UKAS accredited certification body – Number 113.

*The schedule of the current scope of accreditation for product certification is available in pdf format via the UKAS link on the BBA website at www.bbacerts.co.uk
Readers MUST check the validity and latest issue number of this Agrément Certificate by either referring to the BBA website or contacting the BBA directly.*

Regulations

In the opinion of the BBA, DuPont AirGuard Reflective, if installed, used and maintained in accordance with this Certificate, can satisfy or contribute to satisfying the relevant requirements of the following Building Regulations (the presence of a UK map indicates that the subject is related to the Building Regulations in the region or regions of the UK depicted):

The Building Regulations 2010 (England and Wales) (as amended)

Requirement:	B3(4)	External fire spread
Comment:		The product can contribute to satisfying this Requirement. See section 10.1 of this Certificate.
Requirement:	B4(1)	External fire spread
Comment:		The product is restricted by this Requirement. See section 10 of this Certificate.
Requirement:	C2(c)	Resistance to moisture
Comment:		The product can contribute to limiting the risk of interstitial condensation. See section 6.3 of this Certificate.
Requirement:	L1(a)(i)	Conservation of fuel and power
Comment:		The product can contribute to satisfying this Requirement. See sections 7 and 8 of this Certificate.
Regulation:	7(1)	Materials and workmanship
Comment:		The product is acceptable. See section 12 and the <i>Installation</i> part of this Certificate.
Regulation:	26	CO₂ emission rates for new buildings
Regulation:	26A	Fabric energy efficiency rates for new dwellings (applicable to England only)
Regulation:	26A	Primary energy consumption rates for new buildings (applicable to Wales only)
Regulation:	26B	Fabric performance values for new dwellings (applicable to Wales only)
Comment:		The product can contribute to satisfying these Regulations. See sections 7 and 8 of this Certificate.

The Building (Scotland) Regulations 2004 (as amended)

Regulation:	8(1)	Durability, workmanship and fitness of materials
Comment:		The product can contribute to a construction satisfying this Regulation. See section 12 and the <i>Installation</i> part of this Certificate.
Regulation:	9	Building standards applicable to construction
Standard:	2.4	Cavities
Comment:		The product can contribute to satisfying this Standard with respect to clause 2.4.2 ⁽¹⁾⁽²⁾ . See section 10.1 of this Certificate.
Standard:	3.15	Condensation
Comment:		The product can contribute to limiting the risk of interstitial condensation, with reference to clauses 3.15.1 ⁽¹⁾⁽²⁾ and 3.15.5 ⁽¹⁾⁽²⁾ of this Standard. See section 6.3 of this Certificate.
Standard:	6.1(b)	Carbon dioxide emissions
Standard:	6.2	Building insulation envelope
Comment:		The product can contribute to satisfying the requirements of these Standards, with reference to clauses 6.1.1 ⁽¹⁾ , 6.1.2 ⁽²⁾ , 6.2.4 ⁽¹⁾ , 6.2.6 ⁽²⁾ , 6.2.10 ⁽¹⁾ , 6.2.11 ⁽¹⁾⁽²⁾ , 6.2.12 ⁽²⁾ and 6.2.13 ⁽²⁾ . See sections 7 and 8 of this Certificate.

Standard:	7.1(a)(b)	Statement of sustainability
Comment:		The product can contribute to meeting the relevant requirements of Regulation 9, Standards 1 to 6 and therefore will contribute to a construction meeting a bronze level of sustainability as defined in this Standard. In addition, the product can contribute to a construction meeting a higher level of sustainability as defined in this Standard, with reference to clauses 7.1.4 ⁽¹⁾ [Aspects 1 ⁽¹⁾ and 2 ⁽¹⁾], 7.1.6 ⁽¹⁾⁽²⁾ [Aspects 1 ⁽¹⁾⁽²⁾ and 2 ⁽¹⁾⁽²⁾], 7.1.7 ⁽¹⁾ [Aspect 1 ⁽¹⁾], 7.1.9 ⁽²⁾ [Aspects 1 ⁽²⁾ and 2 ⁽²⁾] and 7.1.10 ⁽²⁾ [Aspects 1 ⁽²⁾]. See sections 7 and 8 of this Certificate.
Regulation:	12	Building standards applicable to conversions
Comment:		Comments in relation to the product under Regulation 9, Standards 1 to 6 also apply to this Regulation, with reference to clause 0.12.1 ⁽¹⁾⁽²⁾ and Schedule 6 ⁽¹⁾⁽²⁾ .
		(1) Technical Handbook (Domestic). (2) Technical Handbook (Non-Domestic).

The Building Regulations (Northern Ireland) 2012 (as amended)

Regulation:	23(a)(i)	Fitness of materials and workmanship
Comment:	(iii)(b)(i)	The product is acceptable. See section 12 and the <i>Installation</i> part of this Certificate.
Regulation:	29	Condensation
Comment:		The product can contribute to limiting the risk of interstitial condensation. See section 6.3 of this Certificate.
Regulation:	35(4)	Internal fire spread - structure
Comment:		The product can contribute to satisfying this Regulation. See section 10.1 of this Certificate.
Regulation:	39(a)(i)	Conservation measures
Regulation:	40(2)	Target carbon dioxide emission rate
Comment:		The product can contribute to satisfying these Regulations. See sections 7 and 8 of this Certificate.

Construction (Design and Management) Regulations 2015

Construction (Design and Management) Regulations (Northern Ireland) 2016

Information in this Certificate may assist the client, designer (including Principal Designer) and contractor (including Principal Contractor) to address their obligations under these Regulations.

See section: 1 *Description* (1.3) of this Certificate.

Additional Information

NHBC Standards 2021

In the opinion of the BBA, DuPont AirGuard Reflective, if installed, used and maintained in accordance with this Certificate, can satisfy or contribute to satisfying the relevant requirements in relation to *NHBC Standards*, Chapters 6.2 *External timber framed walls*, 6.9 *Curtain walling and cladding*, 6.10 *Light steel framed walls and floors* and 9.2 *Wall and ceiling finishes*.

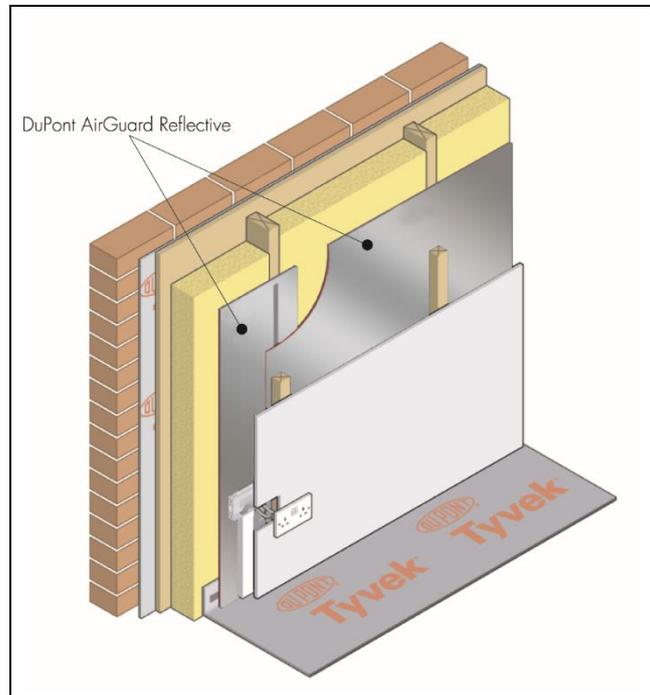

CE marking

The Certificate holder has taken the responsibility of CE marking the product in accordance with harmonised European Standard EN 13984 : 2013.

1 Description

1.1 DuPont AirGuard Reflective is an air barrier and vapour control layer with a low-emissivity aluminium foil face on one side. It is placed on the warm side of the insulation with the foil surface facing the interior of the building. A typical wall and floor installation is shown in Figure 1.

Figure 1 Typical wall and floor installation

1.2 DuPont AirGuard Reflective consists of a spunbond polypropylene substrate, coated with a layer of polyethylene (LDPE) with a polypropylene grid and a 7 µm layer of aluminium foil.

1.3 The product has the nominal characteristics of:

Thickness (mm)	0.43
Mass per unit area ($\text{g}\cdot\text{m}^{-2}$)	149
Roll length (m)	50
Roll width (m)	1.5
Equivalent air layer thickness — s_d (m)	
minimum	500
nominal	2000
Water vapour resistance ($\text{MN}\cdot\text{s}\cdot\text{g}^{-1}$)	
minimum	2500
nominal	10000
Watertightness	pass
Tensile strength (N per 50 mm)	
longitudinal	400
transverse	210
Elongation at maximum tensile force (%)	
longitudinal	25
transverse	21
Nail tear (N)	
longitudinal	210
transverse	210
Reaction to fire	Class E.

1.4 The following products are used in conjunction with DuPont AirGuard Reflective to minimise air infiltration:

- TYVEK Metallised Tape — to close laps between the membrane
- TYVEK Acrylic Tape (double-sided) — an acrylic tape for sealing overlaps and bonding membrane to smooth surfaces
- TYVEK Butyl Tape — a double-sided tape used for sealing membrane joints, between the membrane and common building materials at detailing and at nail penetrations.

2 Manufacture

2.1 The product is manufactured by spinning strands of polypropylene and bonding them together with heat and pressure. The polypropylene is laminated to the aluminium foil and polypropylene grid extrusion using the LDPE by extrusion.

2.2 As part of the assessment and ongoing surveillance of product quality, the BBA has:

- agreed with the manufacturer the quality control procedures and product testing to be undertaken
- assessed and agreed the quality control operated over batches of incoming materials
- monitored the production process and verified that it is in accordance with the documented process
- evaluated the process for management of nonconformities
- checked that equipment has been properly tested and calibrated
- undertaken to carry out the above measures on a regular basis through a surveillance process, to verify that the specifications and quality control operated by the manufacturer are being maintained.

3 Delivery and site handling

3.1 Rolls of product are delivered to site in packages that carry a label bearing the marketing company's name, the grade identification and the BBA logo incorporating the number of this Certificate.

3.2 The rolls should be stored flat on their sides, on a smooth, clean, dry surface, under cover and protected from sunlight.

Assessment and Technical Investigations

The following is a summary of the assessment and technical investigations carried out on DuPont AirGuard Reflective.

Design Considerations

4 Use

4.1 DuPont AirGuard Reflective is satisfactory for use as an air barrier and vapour control layer in all conventional timber-frame, steel-frame and masonry walls and floor structures and as part of the DuPont Climate System for walls in conjunction with TYVEK Reflex (see Product Sheet 3 of this Certificate and Figure 1). The product is satisfactory for use as a radiant barrier when the foil surface is facing towards the exterior of the building into an air space.

4.2 Where constructions need to comply with *NHBC Standards 2021*, specifiers should observe the requirements of this document.

4.3 It is essential that proper care and attention is given to maintaining the product's integrity and continuity.

4.4 The product is effective in reducing the thermal transmittance (U value) of walls and floors in which it is installed (see section 8). Further information is given in BRE Report BR 262 : 2002.

4.5 Walls in new buildings should be designed and constructed in accordance with the relevant recommendations of BS EN 1996-1-1 : 2005 and BS EN 1996-2 : 2006, and their UK National Annexes.

4.6 Suspended concrete and suspended timber ground floors incorporating the product must include suitable ventilation.

5 Practicability of installation

The product can be readily installed by operatives experienced with this type of product.

6 Risk of condensation

6.1 The risk of condensation occurring will depend upon the properties and vapour resistance of other materials used in the construction, the internal and external conditions, and the effectiveness of the product's installation.

6.2 Consideration must be given in the overall installation to minimising penetrations by services. Joints at ceilings/walls and wall/floor junctions must be sealed to offer significant resistance to water vapour transmission. Sealing should also be carried out in accordance with the Certificate holder's instructions.

6.3 Constructions should be in accordance with the nominal recommendations of BS 5250 : 2011, Annexes F and G, and favourably assessed in accordance with Annex D, using a minimum air layer equivalent value (s_d) of not less than 500 m (equivalent to a water vapour resistance of $2500 \text{ MN}\cdot\text{s}\cdot\text{g}^{-1}$) for the product.

7 Air permeability

When lapped, fixed and taped correctly, the product acts as an air barrier and can contribute to elements and junctions minimising heat loss by unplanned air infiltration and exfiltration. Guidance in this respect can be found in the documents supporting the national Building Regulations.

8 Thermal insulation

Calculations of thermal transmittance (U value) should be carried out in accordance with BS EN ISO 6946 : 2017 and BRE Report BR 443 : 2006, using an emissivity value of 0.05 for the foil surface of the product. Where this faces into an unventilated cavity this corresponds to the following cavity thermal resistance values:

- walls
 - a cavity > 20 mm thick, $0.67 \text{ m}^2\cdot\text{K}\cdot\text{W}^{-1}$
- floors
 - a cavity > 17 mm thick, $0.58 \text{ m}^2\cdot\text{K}\cdot\text{W}^{-1}$
 - a cavity > 25 mm thick, $0.80 \text{ m}^2\cdot\text{K}\cdot\text{W}^{-1}$.

9 Strength

The product will resist the normal loads associated with installation of the wall or floor.

10 Properties in relation to fire

10.1 The product is classified as Class E in accordance with EN 13501-1 : 2007⁽¹⁾. Where the product forms the face of a cavity the spacing of cavity barriers are restricted by the national Building Regulations.

(1) Classification report PR-18-0303 issued by FIRES s.r.o. A copy of the report is available from the Certificate holder.

10.2 In England and Wales, the product should not be used on buildings that have a storey at least 18 m above ground level and contain: one or more dwellings, an institution, a room for residential purposes (excluding any room in a hostel, hotel or boarding house), student accommodation, care homes, sheltered housing, hospitals or dormitories in boarding schools.

11 Maintenance

As the product is confined within a wall or floor structure and has suitable durability (see section 12), maintenance is not required. Any damaged areas should be repaired or replaced before completion in accordance with section 15.

12 Durability

The product and taped joints will have a lifetime equal to that of the building element in which it is installed.

Installation

13 General

Installation of DuPont AirGuard Reflective should be in accordance with Certificate holder's instructions and good building practice.

14 Procedure

Walls

14.1 The product is positioned on the warm side of the thermal insulation and held in place by staples at approximately 500 mm centres to the background structure. Joints between adjacent sheets of the material should be lapped 100 mm over a support and be sealed with a strip of either TYVEK Acrylic Tape (double-sided) or TYVEK Metallised Tape (single-sided).

14.2 At all penetrations and abutments the product is cut neatly to fit as closely as possible and the joint sealed with a strip of TYVEK Acrylic Tape (double-sided) and TYVEK Metallised Tape (single-sided). Penetrations must be kept to a minimum.

14.3 The product is made vapour and convection tight at all window and door openings and at other detailing. The membrane is sealed tight against the frame with TYVEK Acrylic Tape (double-sided) or TYVEK Metallised Tape (single-sided) or tucked in and compressed by the frame.

14.4 Internal lining must be set on spacer battens, leaving a minimum gap of 25 mm behind the lining to accommodate wiring and other services and reduce the need for penetrations of the vapour control layer/air barrier.

Floors

14.5 The product is either installed above or beneath the floor boarding and beneath the internal floor finishes.

14.6 Joints between adjacent sheets of the material should be lapped 100 mm and be sealed with a strip of either TYVEK Butyl Tape (double-sided) or TYVEK Metallised Tape (single-sided).

15 Repair

Damage to DuPont AirGuard Reflective can be repaired with TYVEK 2060B Tape. Extensively damaged areas must be made good by overlaying a new sheet sealed in place with TYVEK 2060B Tape or TYVEK Acrylic Tape (double-sided).

16 Tests

16.1 An assessment was made of data in relation to:

- dimensions
- mass per unit area
- tensile strength and elongation
- resistance to nail tear
- tensile shear strength of joint
- resistance to water penetration
- water vapour transmission
- effect of heat ageing
- resistance to alkali
- reaction to fire.

16.2 Tests were carried out to determine:

- dimensional stability
- emissivity
- emissivity after heat ageing for 90 days at 70°C
- emissivity after combined heat and humidity ageing for 90 days at 70°C and 500 hours at 90% relative humidity at 45°C

in order to assess:

- mechanical stability in service
- thermal performance in service
- durability.

17 Investigations

17.1 The manufacturing process was evaluated, including the methods adopted for quality control, and details were obtained of the quality and composition of the materials used.

17.2 The risk of interstitial condensation in a range of typical constructions was evaluated.

17.3 An evaluation was made of the thermal performance of the product in typical constructions.

17.4 An evaluation was carried out of the assessment leading to Prototype Product Assessment 08/P002 for DuPont Climate System.

18 Conditions

18.1 This Certificate:

- relates only to the product/system that is named and described on the front page
- is issued only to the company, firm, organisation or person named on the front page – no other company, firm, organisation or person may hold or claim that this Certificate has been issued to them
- is valid only within the UK
- has to be read, considered and used as a whole document – it may be misleading and will be incomplete to be selective
- is copyright of the BBA
- is subject to English Law.

18.2 Publications, documents, specifications, legislation, regulations, standards and the like referenced in this Certificate are those that were current and/or deemed relevant by the BBA at the date of issue or reissue of this Certificate.

18.3 This Certificate will remain valid for an unlimited period provided that the product/system and its manufacture and/or fabrication, including all related and relevant parts and processes thereof:

- are maintained at or above the levels which have been assessed and found to be satisfactory by the BBA
- continue to be checked as and when deemed appropriate by the BBA under arrangements that it will determine
- are reviewed by the BBA as and when it considers appropriate.

18.4 The BBA has used due skill, care and diligence in preparing this Certificate, but no warranty is provided.

18.5 In issuing this Certificate the BBA is not responsible and is excluded from any liability to any company, firm, organisation or person, for any matters arising directly or indirectly from:

- the presence or absence of any patent, intellectual property or similar rights subsisting in the product/system or any other product/system
- the right of the Certificate holder to manufacture, supply, install, maintain or market the product/system
- actual installations of the product/system, including their nature, design, methods, performance, workmanship and maintenance
- any works and constructions in which the product/system is installed, including their nature, design, methods, performance, workmanship and maintenance
- any loss or damage, including personal injury, howsoever caused by the product/system, including its manufacture, supply, installation, use, maintenance and removal
- any claims by the manufacturer relating to CE marking.

18.6 Any information relating to the manufacture, supply, installation, use, maintenance and removal of this product/system which is contained or referred to in this Certificate is the minimum required to be met when the product/system is manufactured, supplied, installed, used, maintained and removed. It does not purport in any way to restate the requirements of the Health and Safety at Work etc. Act 1974, or of any other statutory, common law or other duty which may exist at the date of issue or reissue of this Certificate; nor is conformity with such information to be taken as satisfying the requirements of the 1974 Act or of any statutory, common law or other duty of care.
