- {a} No change in reaction to fire properties for MW Products. The fire performance of MW does not deteriorate with time. The Euroclass classification of the product is related to the organic content, which cannot increase with time.
- {b} Thermal conductivity of MW products does not change with time, experience has shown the fibre structure to be stable and the porosity contains no other gases than atmospheric air
- {c} For dimensional stability thickness only
- {d} This characteristic also covers handling and installation
- {e} European test methods are under development
- {f} Also valid and applicable for multilayers
